

INTRODUCING!

Hood Latches by **ATRO** Engineered Systems

The physical properties of ATRO's Polyurethane are so superior that rubber simply can't compete. This is true for many truck components and applies to Hood Latches, in particular, because:

- Hood Latches are exposed to the elements – Polyurethane is not affected by chemical attack
- The quality of rubber fluctuates – ATRO polyurethane is consistent.
- Repeated use causes rubber hood latch straps to break.
- ATRO Polyurethane has 3 X the tear strength of rubber.
